HASEEB ALEEM

Senior Full Stack Developer | Node.js, React & TypeScript

Riyadh, Saudi Arabia • +92 308 119 8535 • haseebaleem2802@gmail.com
linkedin.com/in/haseeb-aleem-dev • github.com/Haseebaleem

PROFESSIONAL SUMMARY

Full stack developer with 6+ years of experience delivering web applications across React, Node.js, TypeScript, PHP and PostgreSQL. Led the iPanel multi-tenant platform (50,000 users) and delivered five production applications for UAE clients. Combines frontend delivery with API design, authentication, database optimization and automated testing.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript (strict), PHP 8.2, Node.js, Express, React 18, Next.js 14, Laravel 11, Tailwind CSS, shadcn/ui

Databases & ORMs: PostgreSQL, MySQL, MongoDB, Prisma ORM, Mongoose — atomic transactions, row-level locking, advisory locks, indexing strategy

Backend & Architecture: RESTful APIs, JWT (refresh token rotation), Sanctum, Socket.io, microservices, monorepo (npm workspaces), audit logging, rate limiting, RBAC

Infrastructure & Tooling: Apache (reverse proxy, SSL), Nginx, Linux (Ubuntu), Docker, CI/CD pipelines, Redis, Git/GitHub, Jest, Vitest, PHPUnit, Winston, Multer, Sharp, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer & Team Lead — InstaCom

May 2024 – Jul 2026 | Multan, Pakistan

- Led development of iPanel — a multi-tenant ISP management SaaS on Node.js, Express, React, PostgreSQL, and Prisma — serving multiple internet service providers and 50,000 users.
- Optimized database queries and API response times for a high-throughput multi-tenant production environment handling thousands of queries per second.
- Implemented role-based access control across tenant boundaries, ensuring data isolation between ISP customers while enabling efficient shared infrastructure.
- Architected Apache reverse proxy with SSL virtual hosts supporting React SPA routing and integrated pgAdmin; resolved HTTPS routing edge cases for SPA refresh.
- Set up Docker, a CI/CD pipeline and Redis for iPanel in a non-production environment.
- Led a team of 8: managed sprint planning, code reviews, technical decisions; mentored junior developers and established coding standards across cross-functional teams.
- Drove technical roadmap planning with stakeholders, balancing feature delivery against technical debt reduction and operational stability.

Full Stack Developer — InstaCom

Oct 2023 – Apr 2024 | Multan, Pakistan

- Solo-developed Radius Management System (RMS) v1 — network access management for ISP authentication and accounting; foundation that scaled into iPanel v2.
- Built a customer portal that increased user engagement by 30% via improved UX and load times.
- Designed PostgreSQL schemas yielding 70% performance improvement.
- Built RESTful APIs integrating multiple internal services and third-party endpoints.
- Established Git workflow conventions and code review practices that the team continued to follow as it scaled.

Full Stack Developer — Dee Designers

Jul 2021 – Sep 2023 | Multan, Pakistan (serving UAE-based clients)

- Delivered 5 full-stack production applications for UAE clients: Al Guthmi Online (e-commerce), Rugs Dubai (e-commerce with catalog and order management), Posh Interior (CMS-driven business site), Project Tracking System (internal RBAC project management tool), and Car AC Repair (service booking platform).
- Built responsive applications using React, Node.js, PHP, and MySQL adapted for Middle East market and Arabic-context content; integrated third-party APIs and payment gateways.
- Adapted UI/UX patterns for right-to-left Arabic layouts and culturally appropriate design conventions for the GCC market.
- Collaborated remotely with the Dubai office for requirements, coordination, and delivery; visited UAE office in 2023 for in-person coordination.
- Implemented security best practices and contributed to code review culture across the team.

Full Stack Developer — Data Byes
Apr 2020 – Jul 2021 | Multan, Pakistan

- Built Sell My Phone — a mobile device buyback and trade-in platform with valuation engine.
- Led migration of a monolithic application to a microservices architecture; built custom APIs for external systems integration.
- Collaborated on UI/UX redesign achieving 25% increase in user satisfaction.
- Implemented authentication / authorization mechanisms.
- Mentored two junior developers on Git fundamentals, REST API design, and database query optimization during my final months at the company.

PORTFOLIO PROJECTS

Inventory-POS — Multi-cashier inventory and sales (2026)
Node.js, TypeScript, React, PostgreSQL, Prisma, Tailwind CSS • github.com/Haseebaleem/Inventory-POS

- Implemented atomic sale completion using PostgreSQL row and advisory transaction locks to prevent stock overselling during concurrent sales.
- Built Owner/Cashier authorization, receipts, audit logs and refunds with stock restoration; documented 28 backend tests and 60+ assertions.

Marketplace — Multi-vendor commerce (work in progress) (2026)
Next.js 14, TypeScript, Node.js, PostgreSQL, Prisma • github.com/Haseebaleem/Marketplace

- Organized a monorepo with shared Zod schemas and implemented bounded retries for concurrent product slug collisions.
- Validated image content using Sharp and parallelized processing, reducing a five-image upload from approximately 3 seconds to 935 ms in project testing.

Task-Manager — Real-time collaborative Kanban (2026)
React, Node.js, Express, Socket.io, PostgreSQL, Prisma • github.com/Haseebaleem/Task-Manager

- Built transactional card ordering and board-isolated Socket.io events for collaborative task management.
- Added a reason-required backward-transition workflow with audit logging; documented 38 integration assertions.

NewsHub — Laravel and React news application (2026)
Laravel 11, PHP 8.2, Sanctum, PostgreSQL, React, TypeScript • github.com/Haseebaleem/NewsHub

- Built a server-side news API proxy to keep keys out of the browser and a 10-minute cache to reduce external API usage.
- Implemented bookmarks, reading history, category preferences and reading statistics; documented 47 PHPUnit tests and 142 assertions.

Additional projects are publicly available on GitHub: github.com/Haseebaleem

EDUCATION & LANGUAGES

Bachelor of Science in Computer Science (BSCS) — Bahauddin Zakariya University (BZU), Sep 2022 – Jun 2026
Intermediate in Computer Science (ICS) — Emerson University, Multan, 2020 – 2022 (HEC, IBCC & MOFA attested)
Certifications: Web Development (Net Rider), Spoken English (Ace Institute), SEO (Ace Institute) — Multan, Pakistan.
Languages: English (Professional working proficiency), Urdu (Native).
